

Test Objective:

The objective is to automate the below testcase using selenium WebDriver and framework concepts.

Testcase: Tc05

Process: Search For Shipping Locations

Steps to Execute:

Step1: Login to admin portal

Step2: Navigate to System section->Shipping option

Step3: Choose Shipping Location

Step4: Search for text "Discount"

Expected Results: Verify the search is displayed data with "Discount" keyword or not and when no match check the No matching records found"

Note: As per the test case mail, the mentioned steps indicate that the scenario is related to 'Search For Shipping Locations' but not 'Search For Shipping Method'.

Hi,

PFA day 5 test case,

Process	Steps To Execute	Expected Results
Search For Shipping Methodsss	1. Navigate to Systems section, returns Option 2. Choose Shipping Location 3. Search for the text "Discount"	Verify the search is displayed data with "Discount" keyword or not and when no match check the "No matching records found"
